Education

JUL 2026 *(expected)*
Ph.D., Environmental Engineering
University of Southern California

DEC 2024
M.S., Green Technologies
University of Southern California *(3.9 GPA)*

SEP 2020
M.Sc., Environment and Development
King's College London *(Pass with Distinction)*

JUN 2019
B.Eng., Mechanical and Energy Engineering
Brunel University London *(1st Class Honors)*

Professional experience

AUG 2022 – JUL 2026
Research assistant
University of Southern California (USA)

My research characterizes extreme heat vulnerability in the context of environmental, social, and technological systems in urban settings. I focus on the quantification of thermal comfort and on understanding how people adapt to heat events via air conditioning use.

AUG 2022 – MAY 2026
Teaching assistant
University of Southern California (USA)

Helped teach, held office hours for students, and designed materials for classes including Introduction to Civil Engineering Graphics, Energy Systems and Environmental Tradeoffs, and Statics and Dynamics.

JUN 2019 – JUL 2019
WELL® Building Standard Internship
Aguilera Ingenieros (Spain)

Studied the WELL® and BREEAM® certifications for the assessment of environmental and human impacts of buildings and infrastructure to obtain the WELL® Accredited Professional certification.

AUG 2017 – AUG 2018
Powertrain Solutions Engineering Intern
Bosch (United Kingdom)

I supported engineering change requests, processed investigation orders, supported volume forecasting analysis and conducted testing of on-road and off-road vehicles for UK OE manufacturers.

Profile

I am a Ph.D. candidate in environmental engineering studying how extreme climate hazards, energy systems, and the built environment interact across space and time to shape human livelihoods. I am an interdisciplinary researcher with extensive experience in data collection and analysis, experimental design, and engineering. My interests lie in the nexus of sustainable energy, urban planning and architecture, and climate change mitigation.

Technical strengths & skills

- Programming and data engineering using Python (exploratory and time series analysis, machine learning)
- Handling large datasets and high-performance computing (Bash)
- Spatial analysis and geographic information systems (e.g., ArcGIS)
- Data visualization and research communication
- Bilingual in English and Spanish, fluent in French

Service and volunteering

2024 – present: **Reviewer** for *Environmental Research: Health, Environmental Research Letters* and *Environmental Research: Climate* journals

2022 – 2024: **Member and Student Advisor** for USC Student Sustainability Committee

2023: **Volunteer** for Climate Leadership Conference (Los Angeles, CA)

2013 – 2018: **Community Manager** for Fundación Agua de Coco
