diegoramos@gmx.es

Education

JUL 2026	Ph.D., Environmental Engineering University of Southern California
DEC 2024	M.S., Green Technologies University of Southern California (<i>3.9 GPA</i>)
SEP 2020	M.Sc., Environment and Development King's College London (<i>Pass with Distinction</i>)
JUN 2019	B.Eng., Mechanical and Energy Engineering Brunel University London (<i>1st Class Honors</i>)

Professional experience

AUG 2022 – JUL 2026	Research assistant University of Southern California (USA) Conducted research on extreme heat vulnerability, including the quantification of thermal comfort, the examination of air conditioning use patterns, and the measurement of the effect of cool pavement installations, using climate and energy datasets.
AUG 2022 – MAY 2026	Teaching assistant University of Southern California (USA) Designed materials, held office hours and assisted with teaching classes including Introduction to Civil Engineering Graphics, Energy Systems and Environmental Tradeoffs, and Statics and Dynamics.
JUN 2019 – JUL 2019	WELL® Building Standard Internship Aguilera Ingenieros (Spain) Studied the WELL® and BREEAM® building standards for the assessment of environmental and human impacts of buildings and infrastructure to obtain the WELL® Accredited Professional certification.
AUG 2017 – AUG 2018	Powertrain Solutions Engineering Intern Bosch (United Kingdom) One-year internship in the automotive industry supporting engineering change requests, processing investigation orders, conducting volume forecasting analysis and performing testing of on-road and off-road vehicles for UK original equipment manufacturers.

Profile

I am an interdisciplinary researcher studying how extreme climate hazards, energy systems, and the built environment interact across space and time to shape human livelihoods. I have extensive experience in data collection and analysis, experimental design, and engineering. My interests lie in the nexus of sustainable energy, urban planning and architecture, and climate change mitigation.

Technical strengths & skills

- Programming and data engineering using Python (exploratory and time series analysis, machine learning)
- Handling large datasets and high-performance computing (Bash)
- Spatial analysis and geographic information systems (e.g., ArcGIS)
- Data visualization and research communication
- Bilingual in English and Spanish, fluent in French

Service and volunteering

2024 – present: **Reviewer** for *Environmental Research: Health, Environmental Research Letters* and *Environmental Research: Climate* journals

2022 – 2024: **Member and Student Advisor** for USC Student Sustainability Committee

2023: **Volunteer** for Climate Leadership Conference (Los Angeles, CA)

2013 – 2018: **Community Manager** for Fundación Agua de Coco
